

# Shot!™

## INTRODUCING

# GRAFIX

The new Shot! Grafix range is very exciting- utilising popular barrel designs in 80-90% tungsten this range is coated for a high end fashion look. The darts are custom painted so much so that no two are the same and along with new technology in fluid graphics they come in a range of colours and coatings.

These darts are very decorative and the feel is quite different to other coatings on the market. There is also a subsection of this range where the darts are being air brush custom painted to give a brilliant result.

The range will be available in steel and soft tip.

80% Tungsten  
Steel: SD3209-023 23gm  
Soft : SD3210-018 18gm  
**Fluid Purple**

80% Tungsten
